## APPLICATIONS DEVELOPED

### Surf Check App [GitHub](#) | [Live](#)

- **Front-end** web application that allows users to search for a surf location, check its current surf condition, and save locations to a favorites list.
- Utilized **Ajax** requests with **jQuery** to receive content from two different APIs and dynamically render content to the **DOM** via **JavaScript**.
- Utilized **Figma** for design planning and improved **UX/UI** design.

### DogNet CRM [GitHub](#) | [Live](#)

- **Full stack** solution that allows users to add clients to a database and manage details and activities for each client.
- Developed using **JavaScript (ES6)** and **React.js** for front-end functionality that utilized **Fetch** requests to send and retrieve data and dynamically rendered updated information to the DOM.
- Built **HTTP** servers in **Node.js** using the **Express** framework and utilized **SQL** queries to communicate with a **PostgreSQL** database.
- Implemented mobile responsiveness using **Bootstrap 5** and custom **CSS3**.
